

Hear. Understand. Listen.

Courtroom Audio Solutions

It is vital in courtroom proceedings that individuals experience every word and every moment. Although most people can suffice with a standard sound system, there are inevitably several in every gathering who could use a little help hearing. It might be the acoustics in the courtroom, where they are sitting, the noise around them, or because they speak another language. Listen Technologies' Assistive Listening and Language Interpretation products deliver the clarity, the precision, and the reliability absolutely necessary in an environment where every word can mean so much.

Don't miss a single sound. **Listen**[®]

Are your courtroom proceedings being heard and understood by all?

Be sure they are with Assistive Listening and Language Interpretation solutions from Listen Technologies.

- Limited Lifetime Warranty
- Customized systems to meet any solution
- Exceptional world-wide service and support
- Products are easy to use and easy to install

Language Interpretation

Simultaneous language interpretation helps busy judicial departments maintain efficient courtroom proceedings by facilitating multiple languages allowing a witness to deliver their testimony in their native language. Listen systems are designed to be simple to use allowing the interpreters to focus on interpretation, not the equipment.

Assistive Listening

Listen offers multiple product types to overcome the audio challenges of your courtrooms, while meeting ADA and DDA requirements. Products provide outstanding audio quality and are designed to be durable for daily use. When privacy is a concern a Listen system can provide your courtroom with the security you need.

"The Judges at Calgary Courts made it an issue to 'listen' to the assistive listening system, and were very impressed with its performance."

- Kelly Kruger, Alberta Infrastructure
