Listen Technologies Corporation

Listen Technologies Corporation believes in experiencing every sound, whether it's the carefully chosen words of a tour guide or the subtleties of expression emanating from an orchestra's string section. It's all a vital part of the experience, and Listen is dedicated to making sure every individual hears every sound. Listen's exclusive line of state-of-the-art products and technologies are diverse enough for use in auditory assistance, soundfield situations, tour groups and even language interpretation. Plus, our hands-on style and attention to our clients' needs allows us to custom fit an auditory system to suit any need and any situation. Let no sound go unheard. Listen.

Auditory Assistance

Whether in a theater, in a house of worship, or at a sporting event, individuals want to experience every word and every moment. That's what they come for, and they deserve to participate by hearing every single word. Although most people can suffice with a standard sound system, there are inevitably several in every gathering who could use a little help, or who want an enhanced auditory experience. Listen's products are designed to provide an easy to use and convenient wireless sound solution for your patrons who want to make sure they don't miss a thing.

Imagine missing a professor's words in a classroom, or worse, missing a doctor's words in the operating room. These are what we call "soundfield" problems and they range from merely troublesome to truly life-threatening. Studies have shown that by boosting the audio levels of normal voices you can not only increase retention by as much as 30%, but also eliminate the potential for error in situations where every word matters. Listen's convenient and unobtrusive equipment fills spaces with clear and unmistakable sound. Wherever a large PA system is impractical, a soundfield solution may be the answer. And because no two soundfield situations are the same, Listen can tailor the perfect system to any particular situation.

Tour Groups

When you give a tour, your audience is there to learn. But due to varying noise factors, just hearing the words can prove to be its own challenge for many of your visitors. Often the environment itself poses a problem, especially in workplace tours where machinery, equipment and other voices can combine to make hearing a single tour leader remarkably difficult. By offering Listen sound systems for your visitors, you help ensure that they get the full experience they came for. Plus with features like a simple LCD readout and a battery indicator, the system is not just easy to use, but is often an indispensable part of a tour.

L a n g u a g e I n t e r p r e t a t i o n

With the business world as well as the political world becoming more and more international, the need for reliable and precise language interpretation equipment is greater than ever. When the subtlety of meaning can be lost in as much as a tone of voice, clear sound is vitally important. If you want to understand the message, you have to hear the words. And in order for it all to come through loud and clear, you need equipment dedicated to the task. Listen products deliver the clarity, the precision, and the reliability absolutely necessary in a world where every word can mean so much.
